

Publishing with x10Hosting.com

Sign up for x10hosting.com. You will get an email to activate your account:

Email Confirmation

We need you to confirm this email address in order to get started with your web hosting account. Email confirmation is simple and fast, just visit the below link to complete this process.

Follow the link and it will let you log in to your account.

Select the [Quick FTP](#) link and the following opens up:

Details on your web hosting account are below.

A screenshot of a web hosting account details panel. At the top left, it shows 'Username: uc3201x1' and 'Your Domain: uc3201.x10host.com'. To the right is a blue button labeled 'Open cPanel'. Below this is a 'Close' link. A white box contains instructions: 'Connect your FTP client with this information.' followed by 'Upload files into: public_html'. Below that are the following details: 'Server: xo5.x10hosting.com (Port 21)', 'Username: Your Site Name', and 'Password: Your account password'.

Use the settings above to set up your server in Dreamweaver as follows:

When you select **Save Save** and **Done** you can use the **Files** window to publish your site.

A screenshot of the Dreamweaver FTP settings dialog. It has two tabs: 'Basic' (selected) and 'Advanced'. The 'Basic' tab contains the following fields: 'Server Name' (x10hosting), 'Connect using' (FTP), 'FTP Address' (xo5.x10hosting.com), 'Port' (21), 'Username' (Your Site Name Here), 'Password' (masked with dots), a 'Save' checkbox (checked), a 'Test' button, 'Root Directory' (public_html), and 'Web URL' (http://xo5.x10hosting.com/public_htr).
